

| ECCCHD Public Health Laboratory Testing | | Price |
|--|--|-------|
| COMMON HOMEOWNER TESTS | | |
| Bacteria (Coliform + E. coli) – Tests for presence of bacteria. Recommended annually. | | \$23 |
| Nitrate – Pregnant women and infants are most at risk. May indicate presence of other contaminants. Recommended annually. | | \$23 |
| Total Hardness – Important factor in water softening. May have scaly residues and difficulty lathering. | | \$40 |
| pH – Measures water acidity to help assess corrosivity of water to lead and copper pipes. | | \$11 |
| Fluoride – Naturally occurring in groundwater. Useful for considering fluoride supplements for young children/adolescents. | | \$23 |
| Lead – May leach from lead-containing solder and fixtures due to corrosive water. Especially harmful to pregnant women, infants, and young children. | | \$31 |
| Copper – May leach from pipes due to corrosive water. Water may taste metallic and leave blue-green stains in sinks. | | \$25 |
| ADDITIONAL TESTS AVAILABLE | | |
| Arsenic – Has no taste or odor. Can be toxic even at low levels. Wells should be tested for arsenic at least once before use. | | \$31 |
| E. coli (Quantitative) – Specific type of fecal coliform bacteria. Primarily for water used for publicly – sold produce, or beaches/lakes. <i>Must be scheduled in advance with microbiology team.</i> | | \$30 |
| Heterotrophic Plate Count – General count of microorganisms. <i>Must be scheduled in advance with microbiology team.</i> | | \$30 |
| Iron – Water may have a metallic taste or leave brown or orange stains. | | \$25 |
| Manganese – Water may have black specks, metallic taste, or cause stained plumbing fixtures or laundry. | | \$25 |
| Pseudomonas – Bacteria test primarily for swimming water. | | \$30 |
| Spore Ampoules – Confirms effective equipment sterilization. | | \$19 |
| Metals Bundle (Includes Lead, Copper, Arsenic, Iron, Manganese, Hardness) | | \$120 |
| Homeowners' Bundle (Includes Bacteria, Nitrate, Lead, Copper, Arsenic) | | \$100 |
| Newborn Bundle (Includes Bacteria, Nitrate, Lead, Copper, Fluoride) <i>*Eau Claire County homes with a private well and a pregnant woman or child under 1 living there can have this bundle done for free.</i> | | \$95 |
